

Round Two Innovation Fund project in action

"Welcome to our garden" - at Kempsey Children's Services.

Funded by the Healthy Communities Mid North Coast Innovation Fund, the garden has created a new space for the Centre, the children, families, staff and the wider community.

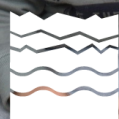

Combining healthy eating and cooking with sustainability, the garden will produce vegetables to be used at the Centre for morning and afternoon teas, and for families to use at home. It's great to see children having the chance to test out their green thumbs to grow and cultivate their own food.

The children and staff at Kempsey Children's Services can often be found tending to, or eating from, the garden.

The new garden space combines healthy eating and sustainability
