

### Project overview...

To educate students in healthy eating options and provide healthy after-school snacks at our homework club for students from refugee, English as an additional language and low socio-economic backgrounds.

### Orara High School Innovation Fund in action...

The Homework Club kicked off on 3 September and donuts were replaced with fruit, veggies and dips.

Principal Mal McFarlane popped in and had a chat with the kids about healthy food choices and everyone was well fed and happy.

Twenty-minute mini lessons are planned for the start of each Homework Club session which will focus on healthy food choices, developing literacy skills around healthy eating as they go.
