

Round Two Innovation Fund project in action

Valla Community Preschool children researched and studied local bush tucker plants alongside Unkya Local Aboriginal Lands Council.

This inspiring project, funded by the Healthy Communities Mid North Coast Innovation Fund, supported the Preschool to revive their bush tucker garden by adopting 14 new bush tucker plants.

The children studied each plant, created illustrations, tried out some healthy recipes (with lots of taste testing too), and created their very own healthy bush tucker recipe book. The recipe book has been shared amongst the Valla community.
